

TEST CERTIFICATE

Certificate Number : 11859/4549

22mm Rubber Grass Roll

Supplied by Grassmats Ltd

Has been tested in accordance with the following standards:

EN 1177: 2018 – Method 1: Determination of Impact Attenuation (HIC)

Product	Natural Grass Sub-base
22mm Rubber Grass Roll	> 3.0 m

EN 13036-4: 2011 – Slip Resistance

22mm Rubber Grass Roll	Dry	92 PTV
	Wet	60 PTV

EN 4790: 1987 – Hot Nut Test – Ease of Ignition *

22mm Rubber Grass Roll	Dry	Meets requirements

NOTE: Products installed in combination with natural materials intended to influence their performance (e.g. rubber mats with grass or sand) cannot be conclusively tested in the laboratory. The critical fall height of such products can only be accurately determined individually by an on-site test, on a mature, fully established installation and will likely vary over time or with climatic conditions. The results contained within this certificate are an indication of the potential Impact Attenuation value achievable by the product tested, however the results apply only to the samples and test conditions detailed within the relevant reports. *Not all tests are within our scope of ISO 17025 accreditation.
