

Stable Matting Equestrian

Stable Mat Specification

We offer a range of different stable mats to suit everyone's preferences. Cobbled top stable mats are often seen as the traditional stable mat. Tried and tested for years these mats benefit both horse and owner through easy maintenance, extra warmth and comfort. Our mats are made from pure, quality rubber and aren't to be confused with lesser, cheaper mats made from composite materials. The cobbled top provides excellent slip resistance while the ridged reverse side allows great drainage and aeration.

An alternative to the traditional bobble/cobble top, amoebic top mats have been found to not only be the easiest to clean and maintain but also the best finish for slip resistance. On the reverse side, each mat still contains ridges while the quality rubber composition keeps the mats non-porous.

The next step up from the amoebic top mat is the interlocking amoebic topped mat taking ease of installation and practicality to the next level. There is a built in connection system allowing each mat to quickly and easily lock in to the next. Once connected the mats act as one unit meaning there is no risk of gaps or overlaps appearing between mats as they are used by the horses. We can also provide ramped edging for these mats ridding your stable of any nasty trip hazards.

Characteristic	Ameobic Top		Bubble		Cobble		Diamond	
Size (m)	1.22 x 1.83		1.22 x 1.83		1.22 x 1.83		1.22 x 1.83
